Together, they empower individuals to be more entrepreneurial and leverages on technologies to develop Innovative products that solves global problems and improve humanity.

VISUAL CONCEPT

The United Nations General Assembly identified 17 Sustainable Development Goals (SDGs) that encompass many aspects of contemporary society. The goals serve as globally-recognised standards that call upon stakeholders across all sectors, including education, to implement them by 2030. Achieving the SDGs, however, is a complex interplay that requires both strategic thinking as well as creative and innovative methods. Solving a Rubik's cube - one of the most famous educational toys ever - resembles this multifaceted process: it takes not only analytical skills and imagination but also hands-on action in solving the puzzle to get all the colours, sides and patterns right within the given time. Like the pieces in a Rubik's cube, the SDGs are interconnected and any decision to move towards a certain direction has an impact on the overall pattern and outcome. The 7th ASEF Rector's Conference and Students' Forum (ARC7) is the platform for students, rectors, policy-makers and education ministers to showcase the interdisciplinary role of higher education in this serious game of developing and sustaining our societies. While the optimal solution may not be the easiest nor the quickest, we know we are moving the pieces in the right order by taking turns in drafting policy recommendations and making commitments towards the SDGs at ARC7.
