Students with disabilities in Indonesia's higher education

Tertiary education in Indonesia

3,072,360 female students

2,627,074 male students

401 disabled students

- Without student with disabilities
- Having student with disabilities

Source: Ministry of Higher Education,
Research and Technology 2017

Challenges to inclusion

- The lack of political will and leadership
- Bureaucratic incompetence
- Administrative inefficiency between different tiers of government,
- Lack of awareness about equal rights as rising social and religious conservatism continues to stigmatise people with disabilities
- The absence of commitment to effective law enforcement and policy implementation

Thanks
